

Pre-Painted.

All doors and frames come with a durable powder-coated finish as standard. This isn't just a primer; it's a high-quality, long-lasting color coating that outperforms traditional hand painting.

Choose from over 20 standard colors, or we can customize the color to match your specific needs. Thanks to our advanced, quick-change powder booths, there are no minimum order requirements or setup charges.

No Minimum Order.

We specialize in fast delivery for small orders. Need just one door for the back of a shop? No problem. While we can also excel in larger orders, we want you to know that no order is too small for Strongdor.

Built-In Astragal.

All Strongdor doors feature an integrated astragal as standard in the construction process, providing a full-height latch guard. This design not only protects your hardware but also enhances the door's overall appearance.

Pre-Hung.

All single doors come pre-hung in the frame, allowing us to ensure that all preparations, strikes, and hardware are correctly aligned before shipping. We also pre-fit gaskets, adjustable anchors, thresholds, and provide an installation kit with everything you need for a smooth installation.

Pre-Installed Hardware.

Exit trims, locks, closers, kick plates, visions, louvers, and more can be pre-installed at our facility before the doors reach your job-site. This eliminates the need for on-site preparation and ensures all hardware has been tested in our factory before shipping. We use Rivet Nuts instead of self-tapping fasteners, ensuring a more secure and durable installation that won't loosen over time.

Fast Install.

Save time and money with our quick-install door frame, and hardware system. The Strongdor system can be installed in as little as 12 minutes and typically takes no more than an hour to complete.

Our patent-pending frame system features adjustable anchors, and all hardware comes pre-installed. Plus, you won't need to hire a painter or remove and re-install hardware!

Short Lead Time.

At Strongdor, we've invested in advanced software systems, eliminating many of the manual processes used by other manufacturers. This automation enhances product quality, speeds up throughput times, and allows us to handle custom sizes and specifications with no extra work over standard!

Custom Sizes.

Through our product refinement throughout the last 15 years, we can manufacture custom sizes and specifications with no impact on other areas of service.

Purchase a door that truly fits your space at **NO EXTRA COST OR LEAD-TIME!**

Install a door and frame in less than 1 hour.

Place the expanding sides onto the jambs.

Wind out the adjustable anchors to get the frame held in position.

Make sure the hinge jamb and head jamb are plumb and square.

Drill through the centre of the adjustable anchors and use the same holes to insert the fasteners.

Hang the door in the frame.

The door is painted, the hardware is installed, and everything is ready to go in less than 1 hour.
